

# Smile Makeover

A 23-year-old female patient visited Diva Dental Clinics Bangalore, with a concern to improve the appearance of her teeth and furthermore to get a smile makeover

She had got one of her front teeth removed 10 yrs back and hence was concerned about the presence of only one large front tooth thus giving an asymmetrical look with a non-pleasing Smile

As a result, Dr. Deepak Rudramoorthy who is an Esthetic and cosmetic dentist in Bangalore took up the case for a smile makeover procedure. Firstly, The Treatment Plan for designing a smile commenced with a Mock-up preparation. Simultaneously, Followed by an intentional root canal treatment of the 3 front teeth and careful shaping of the same teeth to provide space for four teeth to give a set of symmetrical front teeth

And as a result to achieve an attractive smile Finally, Dr. Deepak placed Tooth-colored high-quality zirconia crowns on the prepared tooth structure to give the patient a new look. The patient was highly satisfied by her new look and attractive smile she had been wishing for a long time.

Case 2

## Cap For Discoloured Tooth

This is a case of a patient with a discolored upper front tooth. During a detailed history, the patient mentioned about an injury on the same tooth. After the injury, the right upper front tooth

turned very dark as compared to the adjacent teeth. This resulted in making the patient cover her face every time she smiles. Therefore, she wanted to get a cap for a discolored tooth.

Dr. Deepak (Cosmetic Dentist) took up a complete analysis of the case. The tooth vitality test was negative during the examination. Hence, Dr. Deepak planned a root canal treatment procedure. Afterward, tooth shaping was done to receive a cap for the discolored tooth. A shade matching done in natural light with the adjacent teeth is always carried out for better results. The best way to achieving a good smile makeover is by providing a cap for the discolored tooth.

Ceramic crowns give a life-like beautiful appearance to the teeth they are on. Hence, they are a very good option for crowns for the front teeth.
